When install completes, hit Finish.

You will be prompted to restart. You need to restart in order for the new network drive to function. Click Yes.

My Secure Backup First Tim	e Setup	×
Welcome to My S	ecure Backup	
	This wizard will guide you through the initial setup process for your online storage.	
•	My Secure Backup has many advanced features and options available. We've included the most important ones in this initial setup process. After completing the initial setup you can see all of the options and change your settings at any time in the My Secure Backup configuration dialog.	
	My Secure Backup Setup Steps	
	1. Account Information	
	2. Connect to an Online Disk	
	3. Select My Secure Backup Features	
	4. Configure Automatic Backup	
	Sack Next >	Cancel

After reboot the program will automatically start and the first time setup wizard will appear. Click Next.

Your My Se	cure Backup account is used to	verify your purchase of the My Secure Back	up software.
Domain	: myjdrive	.mysecurebackup.net	(required)
Username	: [
Password	1		

For the domain, enter myjdrive. Username and password are unique to your account and should have been provided. Enter those and click Next.

This next screen will not appear on the first computer you add to a J-Drive account. If this is the first computer you are connecting to J-Drive, skip this screen.

My Secure Backup First Time Setup	×
Existing Backups	
My Secure Backup found existing computer backups on your account.	
Create a new computer backup Set up a backup for this computer, without affecting your other computer backups	
 C Replace a computer backup If you have replaced an old computer with a new computer, or re-installed My Secure Backup on a computer you have backed up before, select the computer you are replacing in the list below. The old backup will be replaced by your new backup. Any files that were backed up previously will not need to be backed up again. RAUSTIN-VPC ▼ C Restore a computer backup If you are installing My Secure Backup to restore files from a backup, selecting this option will open the restore dialog after configuring the application, where you will be able to select the files to restore. 	
< Back Next >	Cancel

If you are reinstalling the software on a computer that had it before, move the radio button to replace and select the computer on the pulldown menu. If this is a new install on a computer not listed, leave the radio button on Create. Click Next.

This screen is for setting up an automatic backup to the new cloud account for this computer you are installing on. It is optional and you can set it up at a later time. For now, set the time to Manual Only then click Next.

Network Drive		
Your	online disk will be available as a network drive that you can copy files to just like a local drive.	
Sett	ings	
Netw	ork Drive Letter: 🗊 🔹	
Maxir	num Cache Size: 5 GB My Secure Backup stores recently accessed files and directories in a local cache to minimize network traffic. You can determine how much space to use for this cache.	
Netv	ork Drives and Anti-Virus Software	
To pr netw	event excess network activity, make sure your anti-virus program is configured not to scan any My Secure Backup ork drives.	

Now is when you will assign the new drive letter. The Default is J, which is what we want to set up. However, if your computer is already using the letter J for a different drive, the next available drive letter will be selected here. The default cache size of 5GB is fine. Click Next.

- ,	iter.	Today 5 of this official disk can be thethed b	elow to enable
Sync Folder	Local Folder		

Adding a Sync folder is another optional feature. What this will allow you to do is select a local folder on your computer that will Sync with a folder on your new J drive. Since this is optional, we won't go through the setup of it here. Just click Next.

My Secure Backup First Time Setup	
Initial Setup Complete	
You have completed the initial setup for My Secure Backup. Your choices will be applied when you click Finish. You can use the configuration dialog to make additional changes.	
< Back	Finish Cancel

The setup wizard is now complete. Click Finish.
